Professional Summary

Full Stack Software Developer with 1+ year of experience developing enterprise ERP systems, analytics dashboards, and business applications using PHP, Angular, React.js, Node.js, TypeScript, MySQL, PostgreSQL, and Express.js. Experienced in REST API development, database optimization, reporting systems, authentication, and scalable enterprise application development.

Technical Skills

Frontend: React.js, Angular, TypeScript, JavaScript, HTML5, CSS3, Bootstrap

Backend: PHP, Node.js, Express.js, Flask, REST API Development

Database: MySQL, PostgreSQL

Programming Languages: PHP, JavaScript, TypeScript, Python

Machine Learning: XGBoost, Gradient Boosting, Scikit-learn, Data Preprocessing

Tools: Git, GitHub, Postman, Visual Studio Code

Concepts: ERP Development, REST APIs, Database Optimization, MVC Architecture, Authentication, Reporting Systems

Professional Experience

Software Developer

Jan 2025 – Present

Tulasi Technologies

Bengaluru, India

- Developed and maintained enterprise ERP modules covering Sales, Inventory, Finance, Billing, Authorization, GST, e-Invoicing, and Reporting using PHP and MySQL.
- Designed and built interactive analytics dashboards using Angular and TypeScript, improving API response performance by approximately 40% through optimized backend queries and efficient frontend data handling.
- Designed and implemented RESTful APIs for ERP modules to enable seamless communication between frontend and backend systems.
- Optimized complex MySQL queries, reporting logic, and backend processing for large transactional datasets, significantly improving report generation performance.
- Collaborated with cross-functional teams to build scalable ERP applications, implement new business requirements, and deliver production-ready software solutions.
- Participated in requirement analysis, debugging, feature enhancements, database modifications, deployment, and production support.

Data Analyst and Software Developer Intern

Oct 2023 – Dec 2023

BLUNET Ventures Pvt Ltd

Bengaluru, India

- Developed machine learning models using XGBoost and Gradient Boosting algorithms for industrial prediction systems.
- Built data preprocessing and transformation pipelines for predictive analytics workflows.
- Developed dashboards to visualize prediction results and business insights.

Projects

Enterprise ERP System

PHP, MySQL

- Developed ERP functionalities for Finance, Inventory, Billing, Authorization, GST, e-Invoice, and Reporting workflows.
- Built RESTful APIs to integrate ERP modules across frontend and backend layers.
- Implemented dynamic reporting modules with advanced filtering, export functionality, and optimized backend database operations.
- Improved reporting performance by optimizing MySQL queries and backend processing logic for large datasets.

ERP Reporting Dashboard

React.js, Node.js, Express.js, PostgreSQL

- Developed a high-performance ERP reporting dashboard using React.js, Node.js, Express.js, and PostgreSQL.
- Designed and implemented RESTful APIs for report generation, dashboard analytics, and seamless frontend-backend integration.
- Improved dashboard loading and rendering performance by over 60% compared to the previous Angular implementation by optimizing React components, refining state management, and reducing unnecessary re-renders.
- Implemented JWT-based authentication and role-based access control (RBAC) for secure application access.
- Built responsive dashboards with advanced filtering, search functionality, pagination, export functionality, and dynamic report visualization.

Cardiovascular Disease Risk Prediction

Python, Flask, XGBoost

- Developed a machine learning-based web application for cardiovascular disease risk prediction and personalized health recommendations.
- Implemented predictive models using XGBoost and Gradient Boosting algorithms to improve prediction accuracy.
- Built frontend and backend workflows using Flask, HTML5, CSS3, Bootstrap, and JavaScript.
- Performed data preprocessing, feature engineering, model evaluation, and visualization using Scikit-learn.

Education	
Master of Computer Applications (MCA) Sir M. Visvesvaraya Institute of Technology CGPA: 9.23	2022 – 2024
Bachelor of Computer Applications (BCA) Bapuji Institute of Hi-Tech Education CGPA: 8.20	2019 – 2022
